---

Can you and I discuss this later this morning? Perhaps you can send me an invitation that works for you. Otherwise, we can consider this afternoon. Thanks.

**Subject:** Monroe Township EPA Draft Comments on Leachate Sewer Discharge Plan

Hi Pat,

Attached are EPA's draft comments on BFI/Republic's 'Monroe Township Landfill Leachate Sewer Discharge Plan' that was submitted to EPA on January 6<sup>th</sup>. As per our discussion last week, it is understood that John Osolin is to hold these comments pending Pete Lopez's review of the plan and the attached draft comments.

On 1/12/21, BFI/Republic requested permission from the Township, NJDEP and EPA, to clean the sanitary sewer line and install flow meters and transducers to obtain baseline flow information of the sewer line. NJDEP approved the request, EPA has not provided a response, and awaits Peter Lopez's input before providing such response (the project team recommends approval). Monroe Township requested additional information from BFI/Republic prior to their approval.

We are prepared to move forward with the comment letter and response to Republic's request, pending Pete's input/approval.

Any questions, let me know.

Thank you,

Rich 4410
